

## Versa-Trak™ Framing System Features

The Versa-Trak Framing System features a track system that will accommodate a diverse variety of filters that will meet just about every customer's needs. The main feature is a "versatile" track that will accommodate standard "Header" type filters and either 1 or 2 each 2" pleated filters. Other standard features are the retractable spring-loaded positive air seal assembly. All of the tracks are gasketed with either foam or felt per customer request. The retractable seal lever locks all of the filters in place after filter placement.

Ordering Information

DESIGNATION OF MODEL #

VT-H-W-----

# Filters HIGH   # Filters WIDE   Up/Down SERVICE   Right/Left   PreFilter Lock   OPTIONS

The Versa-Trak Framing System is designated by the above model number. The HEIGHT and WIDTH designators indicate the number of full sized (24"x24") high and wide. The SERVICE designator indicates either  Upstream or  Downstream servicing, the Lever designator indicates either  Right or  Left hand lever based on the access side, the prefilter locking mechanism option  P and the OPTION designator indicates any options that may need to be added to the order. Always follow the  designator with an explanation
